

Rosita

Spain's Premium Craft Beer

A Spanish born with a Cuban Twist!

Know the Story

Jaume met Núria, 'the girl with the ponytail'. Their families were opposed to this love but didn't manage to break it. Jaume and Nuria decided to go away to Cuba, in search for a better future.

In this new life they were employed at a small sugarcane factory which also brewed cuban beer. Approximately 20 years later the couple returned to Tarragona, Spain, with a smiley-faced daughter called Rosa.

Fast forward to 2007 and a descendent of the family, Ramon, was touched by the story. He opened a brewery in Tarragona, Spain and called it 'Cervezas La Gardenia', where he brewed this Cuban-style beer, historical, sweet and with a touch of honey.

The beer could not be called anything other than 'Rosita'.

Rosita Beer was born in 2007 in a microbrewery called Ceveses la Gardenia, in Alcover, Tarragona, SPAIN.

It is a Mediterranean-style group of ales loved by the most exquisite palates. The master brewers collaborated with a somelier from France in order to make beer pairings and match flavors with the umami of the food, so all formulas are gastro-beers.

Rosita uses the highest quality malts and barleys available in the global market and brew all its ales free of animal products, sugars or GMO's.
