## To treat oneself differently

In this period of time, more and more men and women choose to put their trust in alternative medicines and enjoy the benefits of medicinal plants to heal themselves or to simply maintain their health capital.

Phytotherapy, the most ancient therapy in the world, is the ultimate natural medicine, based on an ancestral knowledge of medicinal plants and essential oils, with multiple healing properties.

## The Aromacie<sup>®</sup> Innovation

The scientific knowledge and the recent technological innovations do allow us today to extract all of the active principles of the plants and the chemotyped essential oils. Their multiple associations offer a great number of new natural products that open many new prescription possibilities while bringing proven effectiveness in complete safety with the recommended doses.

With the recommendations of the pharmacist or health care professional, the HERBAETHIC laboratories offers with AROMACIE<sup>®</sup>, natural products that offer effective, fast and safe action together without any negative effects on the body and the environment.
